EXPLANATORY NOTES

Most of the tables in this publication have been prepared entirely on a monthly basis to provide easy comparison of data. With a few exceptions, annual and quarterly figures are expressed as Monthly Averages, and these can be converted to actual totals by multiplying by 12 and 3 respectively.

For example (from page 5):

Marriages in year 1961 -

Monthly average 567
Therefore annual total = $12 \times 567 = 6,804$
(Actual figure is 6,804)

Births in December quarter 1961 -

Monthly average 1,685
Therefore quarterly total = $3 \times 1,685 = 5,055$
(Actual figure is 5,054)

The statistics as published can be adapted to give information in a number of different forms. For instance -

- (1) Details can be obtained for calendar or financial years as required by addition of figures for the four relevant quarters.
- (2) Progress total for the year to date can be obtained by adding totals of quarters and months.

e.g. If May figures are the latest published, total for the 5 months to May =
 $3 \times$ monthly average of March quarter + April and May.

This procedure can be used to calculate corresponding figures for the same period of the previous two years or similar information on a financial year basis.

Details of production on pages 12 - 15 are for selected items only. Particulars for several commodities of considerable importance in this State have been withheld because publication would reveal confidential information.

ABBREVIATIONS USED

Throughout this bulletin the following symbols have been used -

n.a. Not collected, not available for publication, or not applicable.

.. Nil (or less than 0.5).

p Preliminary figures.

r Revised since previous issue.

_____ Break in continuity of series (where drawn across a column between two consecutive figures).

A blank space in a column of figures means the figure concerned is not yet available.

When the symbol "p" or "r" is placed in the column headed "Period" (as for example on page 17) it refers to all figures on that particular line.

CONSUMER PRICE INDEX

The Consumer Price Index was first published in August 1960 and has been compiled for the periods from 1948. For current statistical purposes it replaces both the "C" Series and the Interim Retail Price Indexes.

The frequency of significant changes in the pattern of household expenditure between 1949 and 1960 made it necessary to construct a series of four short-term retail price indexes. The Consumer Price Index consists of these four indexes chain-linked into a continuous series. This Index measures quarterly variations in retail prices of goods and services representing a high proportion of the expenditure of wage earner households.

The list of items is more extensive than in former indexes and includes home ownership (house price, rates, and repairs and maintenance), rents of government owned houses, major household appliances (such as refrigerators, washing machines, and television sets), private motoring, beer, and other additional items.
